

MEDICAL CARE FOR ALL

**DAMAIRA EXPORTS**

S. NO.	GENERIC NAME	DESCRIPTION	DOSAGE FORM
<b>SNAKE VENOM ANTISERUM</b>			
1	<b>SNAKE VENOM</b>	Snake Venom Antiserum is a sterile preparation containing equine immunoglobulin fragments F (ab') <sub>2</sub> . Freeze dried powder is reconstituted in 10ml of Sterile Water for Injection supplied along with the vial.	Liquid and Lyophilized injection
2	<b>SCORPION VENOM ANTISERUM</b>	Polyvalent anti-scorpion venom serum is prepared from the purified plasma of healthy horses, which have been hyperimmunized against venom of the most dangerous scorpions. The antivenin is purified by pepsin degestion, controlled heating and precipitation by caprylic acid followed by sterilization	Lyophilised, Polyvalent, Enzyme refined Equine immunoglobulins injection
<b>ANTIBACTERIAL</b>			
3	<b>Tetanus Antitoxin 1000 IU / 1500 IU / 3000 IU (1 ml vial)</b>	Tetanus antitoxin neutralizes the toxin produced by Clostridium tetani; the toxin has high affinity for new cells and antitoxin is unlikely to have an effect on toxin that is no longer circulating. Tetanus antitoxins have been used to provide temporary passive immunity against tetanus but tetanus immunoglobulins are preferred.	Liquid Injection
<b>ANTIVIRAL</b>			
4	<b>Anti Rabies Serum (1000 I.U) 5ml Liquid</b>	Rabies antiserum is a sterile, non-pyrogenic solution for intra-muscular administration, containing antiviral substances obtained from the blood serum of healthy equines that have been immunized against rabies by vaccination. In addition, it also contains the anti-microbial agent cresol.	Liquid Injection
